WORKING DOCUMENT

From: General Secretariat of the Council
To: ERAC Standing Working Group on Gender in Research and Innovation
Subject: Work Programme 2018-2019 of the ERAC Standing Working Group (SWG) on Gender in Research and Innovation

Delegations will find attached the Work Programme 2018-2019 of the ERAC Standing Working Group (SWG) on Gender in Research and Innovation as approved by written procedure.
1. Introduction

The work programme of the ERAC Standing Working Group on Gender in Research and Innovation (hereafter referred to as the Standing Working Group or SWG) will cover a period of 18 months (till June 2019) and include the activities the SWG plans to undertake in line with its mandate and the ERA Roadmap. The overall objective of the Standing Working Group is to advise the Council and the European Commission on policies and initiatives on gender equality in Research and Innovation (R&I), for the benefit of scientists, research institutions, universities, businesses and society at large.

Gender equality in R&I is pursued through institutional changes in research organisations and underpinned by the following objectives:

- Gender equality and equal opportunities in research careers
- Gender balance in leadership and decision-making positions
- Integration of the gender dimension in research and innovation content and programmes

2. Mission

In line with its mandate, the Standing Working Group shall:

- Promote the implementation of top action priority 4 in the ERA Communication (COM (2012)392 final) and its related Roadmap 2015-2020;
- Provide policy advice to ERAC on top action priority 4, including the framework conditions and regulatory issues related to gender equality and gender mainstreaming in research, assess progress and address emerging issues related to gender equality and gender mainstreaming identified by Members or ERAC;
- Cooperate with the other ERAC Standing Working Groups and ERA-related groups in order to achieve coordination and ensure that gender is mainstreamed as relevant, and in particular to develop joint position on a gender perspective for international cooperation in STI;
- Provide support to address policy challenges related to gender equality and gender mainstreaming in R&I in the three priority areas;
- Promote mutual learning on gender equality and gender mainstreaming in R&I and on the
implementation of the ERA National Action Plans and Strategies in top action priority 4;

- Recommend good practices to effectively implement the ERA National Action Plans and Strategies in top action priority 4;

- Assess the implementation of Council Conclusions on advancing gender equality in European Research Area of 1 December 2015;

- Advise and contribute to the elaboration of indicators to monitor and assess policies and initiatives on gender equality in R&I;

- Facilitate regular collection of sex-disaggregated data for the She Figures and, where possible, of gender indicators in the field of R&I, in collaboration with national statistical offices;

- Facilitate joint transnational activities, to be implemented with appropriate means;

- Liaise with H2020 National Contact Points (NCPs), national and European stakeholders on matters relating to gender equality and gender mainstreaming in R&I.

3. Working method

The Work Programme translates the mission and goals of the SWG into a concrete work plan to be pursued during the coming eighteen months to effectively address the most strategic policy questions related to its mandate. Key activities will include sharing of good practices and mutual learning and delivery of policy advice on agreed topical issues.

The SWG will work on one agreed topical issue per year:

- 2018: Analysis of the implementation of the CC of 1 Dec 2015 on advancing gender equality in the ERA with a view to working on follow-up Council Conclusions in 2019;

- 2019: Sexual harassment and sexual assault in academia, with a particular focus on international mobility – analysis of actions and measures taken at national and institutional level.

At each meeting appropriate time will be allocated for delegates’ presentations (approx. 3 to 5) on an agreed topic. Questions will be developed to guide a follow-up discussion in meeting, with a view to creating an overview on the topic. Thus, each meeting will generate lessons learnt and preliminary recommendations, to be presented as part of the SWG updates on the work progress achieved.

Topics identified for policy advice, mutual learning and best practice sharing:
- Gender in Open Science and Open Innovation
- Gender dimension in research and innovation, including the role of RFOs
- Gender in innovation and entrepreneurship
- Implicit gender bias: combating gender bias in rewards and peer review, hiring and evaluation
- Structural and institutional change in organizations
- Gender pay gap and salaries
- Follow-up to the Helsinki Group & European Commission guidance on gender balance in decision making and professorships
